

wall decal application guide

Tools | masking or painters tape • credit card (covered with kleenex) • decal

1. Place your decal in it's desired position. Tape your decal on either side gently to act as tabs (using masking or painters tape)

2. Tape it across the centre (top to bottom)

3. Lift the right side and bring across to opposite side and gently crease the centre of the decal (along the centre tape line)

4. Remove the backing from the right side and tear it off along the crease line

5. Hold the decal in one hand and apply with the other or have someone hold the decal for you against the wall on an angle, but far enough away that it's not coming into contact with wall surface

6. Starting from the centre, moving to the right side, gentle apply the decal (Using a credit card wrapped in kleenex works well - so that you are not scratching the decal and will help with even application) Use a swiping motion from top to bottom

Then Repeat Steps 3-6
